

Our partners

International Plastic Systems range of products is drawn from some of the world's leading manufacturers of thermoplastic pipes, fittings, valves, support systems, installation tools and welding equipment:

AGRU

AGRU Kunststofftechnik GmbH is an internationally recognised leader in the manufacture of thermoplastic piping systems. With headquarters in Austria, and production and distribution facilities worldwide, AGRU products are utilised in all spheres of industry. AGRU piping systems are manufactured from Polypropylene, PVDF, Polyethylene, and ECTFE materials, and their range also includes sheets, rods, bars and concrete protective linings.

Asahi/America

Asahi/America are partners with AGRU and have a special focus on products for environmental protection, including Poly-Flo, a unique twin-wall double containment piping system.

ASV Stübbe

ASV Stübbe produced the world's first injection moulded thermoplastic ball valves in 1961. Since that time the company has expanded and grown to feature a diverse product range of thermoplastic fluid handling products. The range of products from ASV Stübbe includes valves, thermoplastic pumps, pressure retaining and reducing valves, variable area flow meters, and process monitoring and control devices.

Durapipe/FIP

Durapipe is the UK's leading manufacturer of high performance plastic piping systems. Since commencing production in the early 1950's, Durapipe has pioneered the use of ABS for industrial piping applications where strength, zero-toxicity and low temperature working capability have been the key requirements. Their brand is synonymous with high quality piping systems in ABS, PVC-U, Polypropylene and Polyethylene.

Egli Fischer

Egli Fischer manufactures the world famous 'CLIC' pipe clamp system. This is a modular range of pipe clamps and accessories used to install both metric and imperial sized pipes, tubes, cables and conduits in a wide range of dimensions.

Gawaplast

Gawaplast are suppliers of thermoplastic welding equipment, including combined socket and butt fusion machines, as well as butt-welding equipment for site and workshop use.

Harvel Plastics Inc.

Harvel began pipe extrusion over 40 years ago, and are widely recognised for their experience in producing PVC-U and PVC-C pipes in dimensions up to 24". Production is centred on two manufacturing sites in the USA and their acronym 'The Quality Line' accurately reflects their approach to production and continuous improvement as an industry leader.

Hidroten

The Hidroten range of products includes PVC-U valves and fittings for swimming pools and other fluid handling applications.

Our partners

IBG

Insigne Berg Groep BV, has produced metric PVC-U piping products for more than 30 years. Operating from a highly efficient manufacturing facility in Holland, IBG designs and manufactures its range of PVC-U pipe fittings in dimensions up to 400mm in accordance with strict European standards.

IPS Corporation

IPS Corporation was one of the first companies in the world to formulate reliable and dependable solvent cements for PVC-U, PVC-C and ABS piping systems more than forty years ago. Since that time IPS Corporation has grown to become a world leader in the development and production of innovative solvent cement welding products. The 'Weld-On' range includes specialist solvent cements, primers and adhesives that are suitable for bonding similar and dissimilar materials in a diversity of dimensions and operating conditions, greatly simplifying the installation process.

Ludwig Praher

Praher valves are manufactured in Austria and the USA from PVC-U, PVDF and polypropylene. The range includes both manual and actuated valves with a choice of sealing materials and end connection types. Valve styles include ball, gate, butterfly and diaphragm types, making this range suitable for a wide selection of applications.

Reed Tools

Since 1896, Reed has been producing high quality pipe tools and vices in the city of Erie, Pennsylvania, USA. Today the range features an extensive choice of plumbing and pipefitting tools for metal and thermoplastic systems. For the thermoplastic piping installer Reed offers a range of pipe cutters, bevelling and de-burring tools, pipe stands and vices, strap wrenches and specialist clean room tools for demanding applications.

Spears Manufacturing Co.

Spears are the world's largest producers of PVC-U and PVC-C fittings and valves, and they hold an enviable reputation for exceptional products and outstanding service. Manufactured in several USA locations, Spears products are distributed worldwide through a long established network of distributors. Spears product range includes injection-moulded fittings in sizes up to 16", with manual and actuated valves up to 24". In addition, Spears also manufacture a comprehensive range of fabricated thermoplastic fittings in dimensions up to 24".

Valterra Products

Valterra produces a range of low-pressure slide gate valves, which are ideally suited to applications found in swimming pools, irrigation, wastewater and sewage, as well as aquaculture and plumbing systems.

Wegener

With businesses in Europe and North America, Wegener are one of the leading manufacturers of plastics welding equipment for fabricators. Their range includes hot gas (air) welders, extrusion welders and semi-or fully-automatic sheet butt welding or bending equipment

WIDOS

Since becoming established in 1946, WIDOS has been manufacturing precision engineered equipment from their base in Germany. The company has been producing plastic welding machines since 1967 and is now a market leader and innovator.
