

pipes and fittings - metric sizes

PolyPure Natural Polypropylene piping is manufactured and protective packed using a special grade of natural polypropylene raw material. The products arrive on site clean and ready for use to handle foodstuffs, pharmaceutical chemicals, or indeed any fluid which requires extra cleanliness.

PolyPure also has another unique benefit - the pipes and fittings are translucent, allowing full visibility of the fluid flow throughout the system.

PolyPure systems are joined together using a simple butt weld technique utilising standard equipment. For guaranteed reliability, joints can also be made using the latest fully automatic SP series welding equipment. This state-of-the-art machine provides the highest quality welds, and will record all weld information, thereby allowing full traceability from raw material to installed pipework.

PolyPure contains no additives, and is FDA approved.

Polypropylene with steel core.

PolyPure Diaphragm Valve

Description: In-line diaphragm valve with position indicator

Mounting: In any position

Maximum Fluid Pressure at 20°C: 10 bar

Fluid Temperature Range: 0°C - 50°C

Construction:

Body: Polypropylene Natural

Diaphragm: PTFE (EPDM backed)

End Connections: Fusion spigots
