

**Small Capacity Plastic Pumps**

KHB/SHB

KMB

ETLB

Single stage, end-suction centrifugal pumps with small capacities. Direct coupled to a special single or three-phase electric motor. Pump casing and wetted parts of high quality thermoplastic material like PP, HD-PE and PVDF. Closed impeller with shaft sleeve, fixed to the motor shaft, independent from direction of rotation. Shaft sealing by mechanical seals.

Types (see pictures):

- KHB
  - Horizontal design
  - Sizes from 15-80mm to 25-125mm
- ETLB
  - Vertical sump pump
  - From the ETLB range Size 15-60mm
- KMB
  - Horizontal design
  - Seal-less and hermetically sealed, with mechanical coupling
  - Sizes 15-80mm and 25-125mm
- SHB
  - Horizontal design
  - Sizes from 25-125mm to 40-125mm
